

BEINNEUN 2 WIND FARM

Viewpoint 2
A87 north of Site

Existing View
 Located at a forestry entrance the views south, east and west are curtailed by nearby forestry, and rising hills where two of the existing Beinneun turbines are openly visible on the skyline, with blades and tips of a few others also visible turning above. The Bunloinn turbines to the south-west will be largely screened by nearby forestry unless it is felled. The landform drops away slightly to the northeast which affords a more open view towards the uplands beyond Glen Moriston, where Tomchrasky wind farm will be openly visible once constructed.

Predicted Change
 Four of the proposed turbines would be seen as a tight group on the skyline, slightly lower down and further along from the existing turbines. They would appear of a similar scale to the existing turbines given their lower elevation and increased distance. At night, aviation lights on these four turbines would be seen looking along the road to the south, in the opposite direction to the lights on Tomchrasky which will be in open view.

Cumulative
 No wind farms in planning or scoping would be visible from this location.

-  90° baseline panorama and cumulative wireline
-  53.5° photomontage
