

BEINNEUN 2 WIND FARM

Viewpoint 3
A87 south of Site

Existing View
This view is from a layby off the A87 as it passes above Loch Garry and is focussed out across Loch Garry to the south and along the glen to the east and west. Looking south, towards the Site, a forested hillside rises sharply and contains views.

Predicted Change
The upper towers and rotors of two of the proposed turbines would be seen above the hill to the north, appearing very large and close at this location, with landform and trees screening the rest of the Development. At night the lights on these turbines would be visible above the skyline although are likely to appear relatively dim given the viewpoint sits well below the horizontal plane from these. Over the life of the Development, young forestry on the nearby hillside is likely to provide notable screening of these turbines as it grows, including the aviation lights, although the blades may remain visible above it.

Cumulative
No wind farms in planning would be visible from this location. The scoping proposal at Beinn Bheag would be seen relatively distantly amongst forestry and hills looking along Glen Garry to the west.

-  90° baseline panorama and cumulative wireline
-  53.5° photomontage
