

BEINNEUN 2 WIND FARM

Viewpoint 6 A82 at Newtown

Existing View
 This view looks out from a brief open section of the A82 (c. 300 m) across the Great Glen between Loch Oich and Fort Augustus. It looks across the broad valley bottom, extensively covered with woodland and forestry, to low and gently undulating open hills rising beyond where the Millennium and Beinneun wind farms extend along the skyline. Looking along the glen to the south-west, more distinctive hills can be seen in the far distance.

Predicted Change
 The Development would be partially visible on the skyline to the left of the closer Millennium turbines and in front of the more distant Beinneun turbines. They would not be obviously larger than the closer existing turbines and would sit lower on the skyline. They would be a relatively minor addition to the turbines already seen along the skyline and not particularly notable. At night, six of the aviation lights would be seen standing clear above the skyline with a further four lights seen on it.

Cumulative
 Millennium East would be seen to the right of the existing Millennium turbines, and extending around behind them. They would appear closer and larger than the existing turbines and the Development and, at night, aviation lights on three of these turbines would be seen across the valley. No other schemes in planning or scoping are visible from here.
