

BEINNEUN 2 WIND FARM

Viewpoint 9 Corrieairack Pass

Existing View
 This view looks out from a high upland pass, down towards the Great Glen and the distant uplands beyond. The existing Millennium and Beinneun wind farms are openly visible on the smooth hills beyond the Great Glen to the north-west, and Bunloinn will also form part of this cluster. Another more distant cluster of existing and consented wind farms is seen to the north.

Predicted Change
 The Development would be seen across the lower hill slopes in front of Beinneun, Tomchrasky and Millennium. The turbines would be closer and obviously taller but would sit lower in the landscape with the existing wind farms above. At night, all of the aviation lights would be visible, extending the spread of aviation lights seen on Bunloinn.

Cumulative
 Culachy would be seen in close proximity on the nearby moorland, directly in front of the Development. Millennium East would be seen to the right of the existing Millennium wind farm, with turbines appearing notably taller, and Beinn Bheag would be a more distant feature amongst hills to the west. Other schemes in planning or scoping would be very distant and/or amongst groups of existing and consented wind farms and would not be readily discernible.

-  90° baseline panorama and cumulative wireline
-  53.5° photomontage
